Brief Summary of the Invention

The invention a security system that will anticipate a  
Problem before it transpires

COPY OF PAPERS  
ORIGINALLY FILED

### Background of the Invention

The invention is a hybreed of technologies that exist  
That used in this configuration will produce a configuration  
That will in advance recognize a problem.

## **Cross Reference**

**There is no cross reference to this title,because it is s specific design to be used as a security system**

### Detailed description of the invention

The invention is neveau thinking tthat came to light,in june of 1999;

In incoperates many technologies that are on the market ,but never

Used in this way ,it can mirror and or dirict an f14 fantom jet on its

Way and pin point a problem before it starts, and is usable to

Areas, personell and buildings.thus allowing an item to be in a matrix

Putting it thru a series a of situatuions while the subject is on screen

In what is called virtual reality.

Virtual reality into matis plus programming

Inventor

George Guerracino  
33 Blossom St.  
Boston MA. 02114

- 1a] virtual reality is described as any item that can be picked out of real life.
- 2a] a matrix is described as holding that item or [thing] as to where it would be on a map.
- 3a] programming is described as the vehicle that would move that item or [thing] within the matrix.

**Statement regarding federal sponsored**

Because this is a private enterprise not associated with  
Foundations, federal funds are virtual out of reach.

Field of endevor

COPY OF PAPERS  
ORIGINALLY FILED

AS mentioned before the invention, field of endevor is ,

A security system tha t would be applicable to in decendeing  
Order personell ,buildings, and areas,that would anticipat a problem  
Before it happened.
